DESIGN DENTAL CHAIR FOR EVERYONE

NIRVA 13

Nirva 13 is an ergonomic operator seat which a built-in wireless foot control. It offers the best comfort ever seen for the dentist.

Designed and approved for over 20 years, 95% of dentists who try the experience are now convinced and faithful to the concept.

Ergonomy and comfort all in one

Pain-free and stress-free, the dentist is taking care of the quality of approach in practice

On a Nirva 13 seat, the eye height is 20cm higher than on a conventional chair. This overhanging position of the working area makes it possible in direct vision of the maxillary, even when the dentist is operating in the 12:00 o'clock position.

Advantages

Better respiratory and cardiac rates. Respect of lordosis and cyphosis in the vertical column

Overlooking work in working area for hours without getting tired

Work for hours without getting tired. Perfect approach to patient: legs at 45°

Wireless foot control with no unnecessary movements

Suits all morphologies Works abdominal muscles and not the back
